Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Most ethical categories are based upon philosophical concepts rather than scientific laws. The truth can be known with theanthropic ethics, which understands theology as a scientific discipline. By using this approach, author Brian Keen, president of the Ethics Institute, describes a method for applying professional ethical standards using scientific methodologies. Individuals can use this approach to become successful, and businesses can apply these concepts in preparation of achieving a Certified Ethical Enterprise status. Keen considers what the nature of the universe s creator, the Bible, and competing religious ideas mean for humanity and individuals, exploring along the way what thinkers such as Martin Luther, John Calvin and others said about the nature of God. Other topics include the life of Jesus, the study of ethereal beings, anthropology, the study of sickness, and more. Determine the difference between truths and lies and answer any ethical dilemma with a detailed study of religion. Start achieving your goals with Power Living Through Science.
